Preconfigured Interfaces

Seamlessly Integrating Oracle Cloud HCM to Your System Landscape

Are you ready to unleash the true power of Oracle Cloud HCM across your business? Integrating Oracle Cloud HCM with your HR, payroll and enterprise systems enhances your data's consistency, integrity and reliability. It creates a connected data landscape which empowers strategic people analytics, efficient HR processes, and secure data practices across the board.

However, all too often, companies struggle to integrate Oracle Cloud HCM within their system landscape. HCM-related data may be mastered in Oracle, while your other systems have a continued dependency on this data. At Epicenter, we recognise that data consistently flowing to these downstream systems is a key driver for success.

We have developed hundreds of preconfigured interfaces to connect Oracle Cloud HCM with downstream systems, tapping into our expertise to make the process simpler and more efficient than ever before. With many successful deployments around the world, our solution is calibrated specifically towards world-class integration, solving data integrity issues and enabling Oracle HCM Cloud to function as your 'single source of truth'.

These interfaces are preconfigured and already live for other customers, so we simply tailor for your specific requirements, ready to deploy. As preconfigured interfaces are proven, integration success is guaranteed. They also feature reduced time-to-deliver and lower implementation costs.

Preconfigured Interfaces Deliver True Value

- Low Risk: Each interface has already been successfully deployed. It's a proven, low-risk solution. In fact, other Epicenter and Oracle Cloud HCM customers are running these interfaces successfully right now. Want to hear it from the horse's mouth? Simply get in touch with us and we'll set up a call so that you can hear directly from some of our happy customers.

- Efficient: Many configuration settings in an interface are reusable, leaving only a small number which remains to be adjusted to your specific Oracle HCM Cloud set-up. This means you can plug into these proven connectors with ease. You get valuable time back, so you can focus on what you do best.

- Cost Friendly: The high reusability inherent in each preconfigured interface means that we are able to ensure it's a cost friendly solution. Each interface is supported by our Global Support Desk, ensuring that cost friendliness is underpinned by excellent quality.

Supercharge Your Business

Our vast library is filled with preconfigured interfaces that connect Oracle Cloud HCM with the most common system vendors in the industry. If your interface requirement is not currently in our library, that's no problem at all. Our solution experts will configure it within our middleware integration layer. Years of experience empower us to create and launch stable connectors to a wide variety of systems in an accelerated fashion.

You're Evolving. We're Right There with You

Our preconfigured interfaces are sustainable, future proof and flexible, meaning that they evolve with your business. This helps you to tap into the true value of all your systems across geographies and departments. Put simply, preconfigured interfaces are set up to succeed.

If you're ready to say goodbye to frustrating failed integration attempts and endless tricky manual data handling, this is the solution for you.
