

EPICENTER

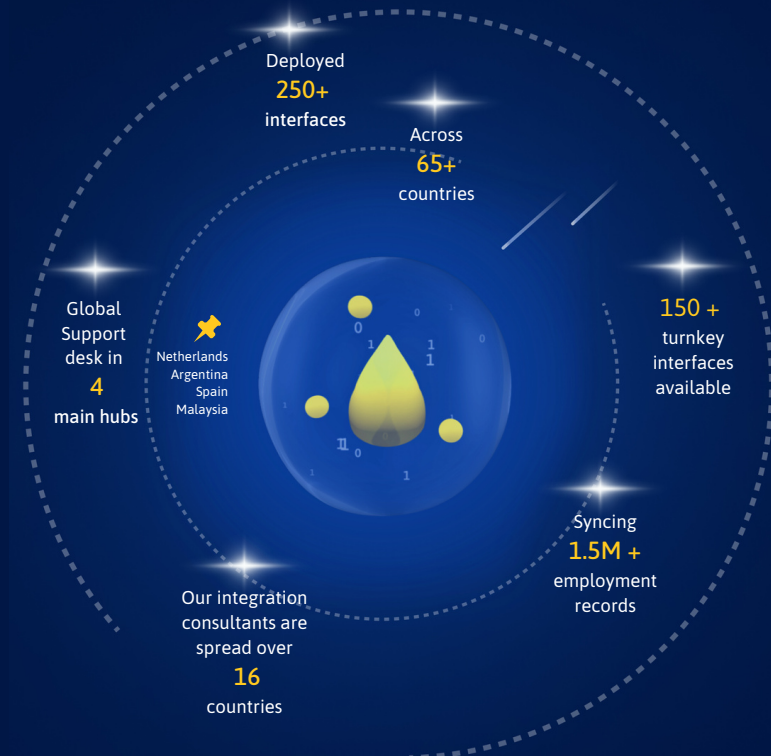

workday ORACLE

Seamless integration between your HRIS & **ADP**

Epicenter is an ADP Partner specialized in integrating ADP applications with market leading HR systems (Oracle HCM Cloud/Workday).

We offer off-the-shelf and cost-effective solutions for your integration requirements, including interface implementation and continuous support.

No matter how specific or intricate your interface requirements, our Center of Integration Expertise supports interface requirements to the highest level of complexity:

Epicenter are THE dedicated global specialists in HCM & Payroll integration.

We also offer data management services such as migration, scrambling and purging to ensure your data is consistent, compliant, and up to date across your system landscape.

Next Level Global Standard Integrations

Epicerter have partnered with ADP to offer standardised integrations between Core HR and leading ADP payroll solutions.

The opportunity to leverage a proven and fully configured interface solution eliminates most of the effort spent on designing and building an interface from scratch.

- Modern, standardised, API, bi-directional integrations
- Near real-time integration
- Global coverage
- Fully proven, high-quality solution
- Low cost, accelerated deployment
- ADP certified

Customers succeed with us due to

- Best-in-class integration software designed and built for payroll integration
- Existing global ADP footprint
- Team of international experts
- End-to-end support & maintenance
- Unparalleled global track record

Our ADP global footprint includes

Our Interface library features preconfigured interfaces with ADP's Global product range (such as Celergo or Global View) as well as many local Systems of Records used by ADP customers.

- GlobalView
- Celergo
